

Before starting:

Since the 1.3.0, Botty let you use multiple MetaTrader account (BDSwiss, VantageFX, AdmiralMarket etc.), but for each account you need a Botty license.

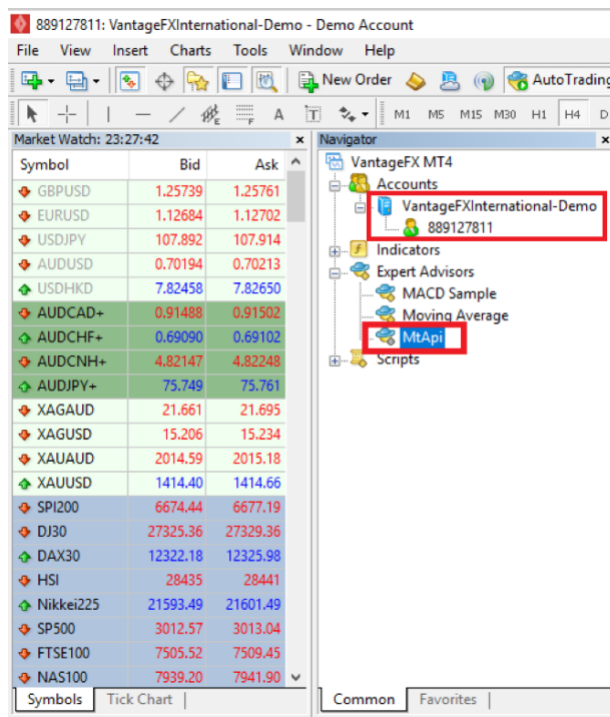

In first you need to have followed the Step-by-Step Tutorial of Botty installation.

For each new MetaTrader account follow this tutorial.

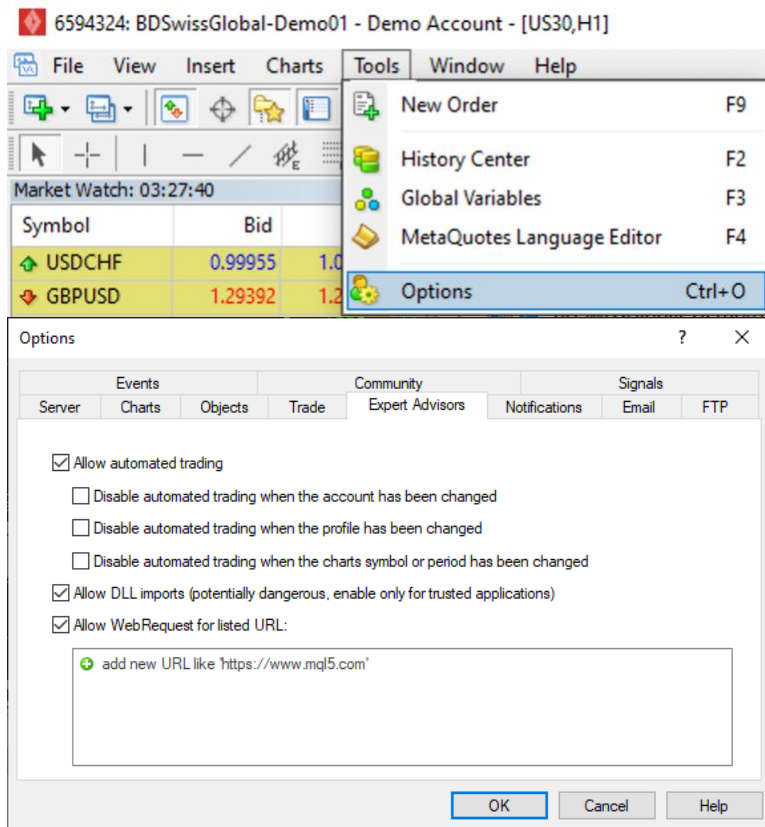

Part 1: Setup bot with MetaTrader 4

IMPORTANT: This tutorial works only with MetaTrader 4. You can download it on your current broker website.

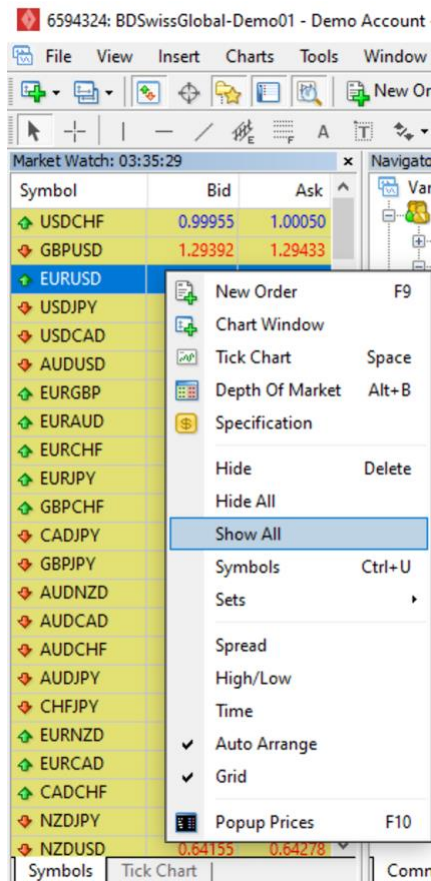

1. Install the second MetaTrader (from another broker).
2. Install a second time [MetaTrader API](#) (Complete installation).
3. Launch MetaTrader 4 and connect your trading account.
4. On MetaTrader4, "MtApi" should be visible on the "Expert Advisors" section and on your trading account:

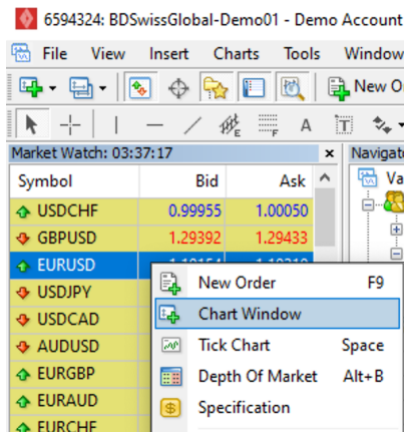

5. On MetaTrader 4, go in Tools -> Options -> Expert Advisors and set the same settings, then OK.

6. On MetaTrader 4 in the "Market Watch" section, right click on a symbol and then click on "Show All":

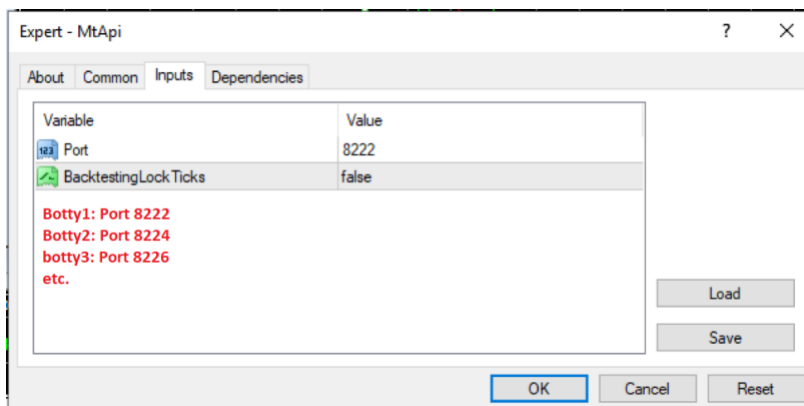

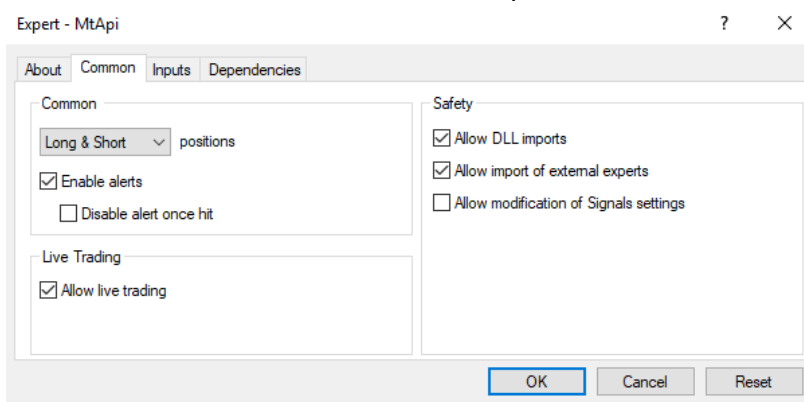

7. Always on MetaTrader 4 in the “Market Watch” section, right click and click on “Chart Window”

8. Right click on the MtApi and Attach to a chart (it does not matter which).

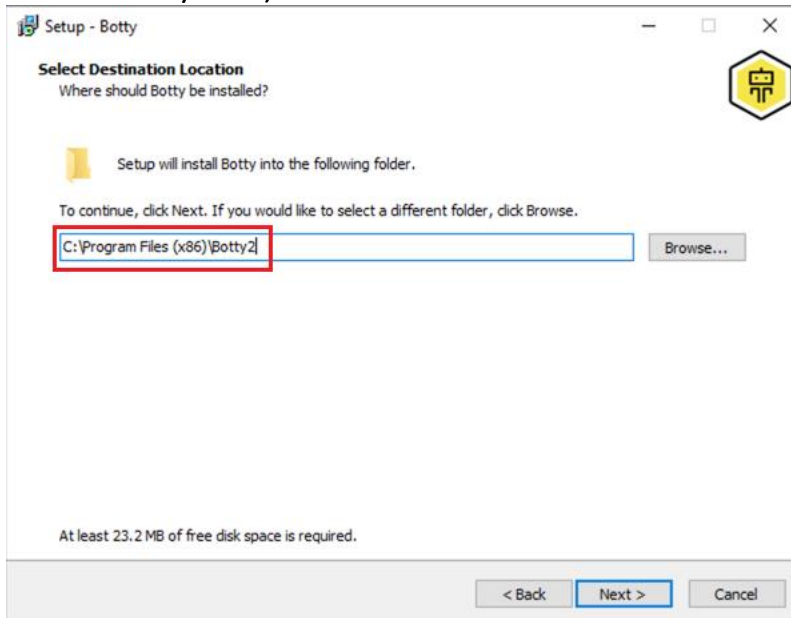

9. A dialog will prompt, set the same settings as the two pictures here below. **Set another port, it needs to be different than the first MetaTrader, you can set 8224:**

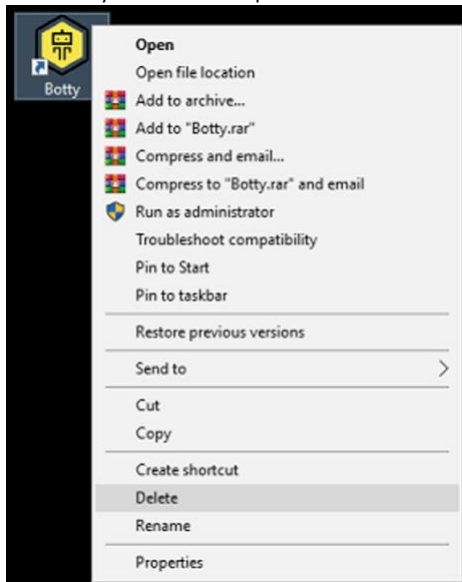

Part 2: Setup Botty

Step 1: Telegram

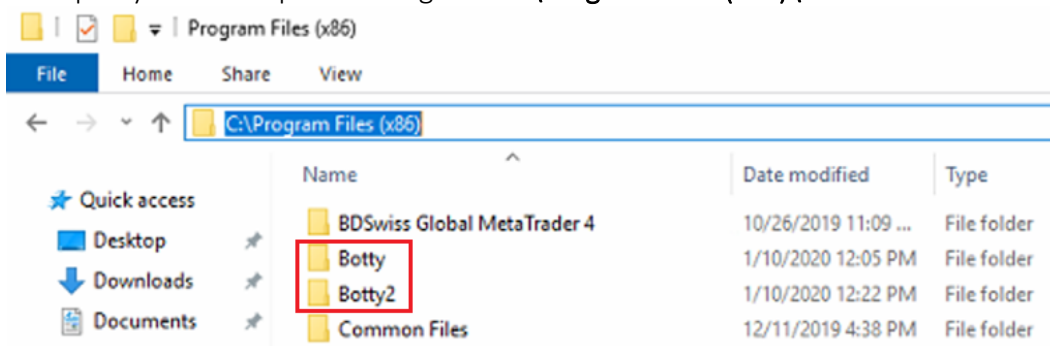

1. Install the second Botty, but set a new path like this "C:\Program Files (x86)\Botty2" (then if you add a third Botty3 etc.)

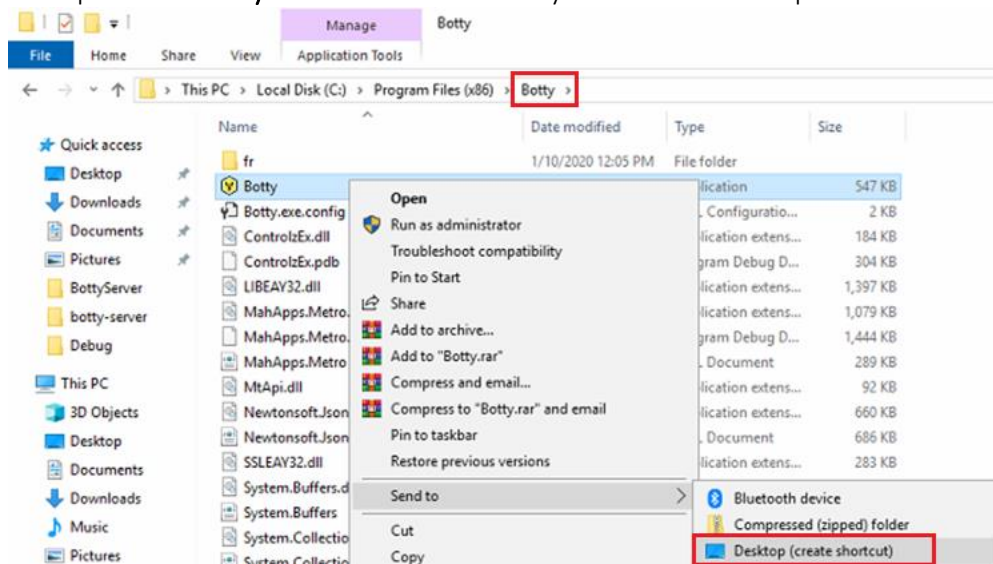

2. On your Desktop remove the Botty icon

3. Open your File explorer and go at "C:\Program Files (x86)\"

4. Open the “**Botty**” folder and send Botty.exe to the desktop.

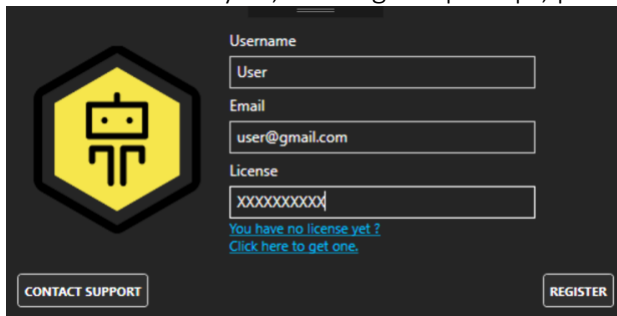

5. On your desktop rename the shortcut “**Botty - Shortcut**” to “**Botty 1**”.

6. Redo like the step 3-4-5(above), but with the “**Botty2**” Folder and rename the shortcut “**Botty 2**”, reproduce for each new Botty that you want.

7. Launch “**Botty 2**”, a dialog will prompt, please enter your second Botty license and click on “**Register**”.

8. On MT4 Settings enter the new port “**8224**” (the port from MTApi when you attach it) and click on “**Connect to MT4**”

9. You can now set your new settings for this second Botty, please reproduce the step from the Step-By-Step tutorial to connect your telegram account, set your money management etc.

10. You can open “**Botty 1**” (don’t forget to keep the multiple MetaTrader open), the two Botty can now work independent.
